

WinCCU Service Pack 3.19

This program will attempt to extract the winccu product update# 3.19 files into your WinCCU directory. The program defaults to c:\winccu32, but can be changed. After running the program move three files named 'rept300.rpt', "rept321.rpt", and "rept330.rpt" to the \rptdir directory under the "winccu32" directory or the directory where the original installation occurred. All files except "rept321.rpt" and "rept330.rpt" should be located in the "winccu32" directory.

This update does not include trend updates for customers who have purchased WinCCU32 with Trend (part# 2017292-005 or 2017292-055). If you have purchased the trend option of WinCCU32, download this update and then call our customer service department (800) 442-3097 option 2 for any available trend updates. These updates can be emailed or mailed.
